## In the Claims

- 1. (Currently Amended) A seamless doll's skin comprising a seamless, injection molded elastomeric material sized and shaped to approximate the size and shape of at least a portion of a doll that is at least partially bendable or articulated which repeatedly covers and is removed from the doll and transforms the doll into a different character or object, and has a wall thickness from 1 to 3mm and is sufficiently flexible and elastic to bend at bending or articulation locations of the doll.
  - 2. (Cancelled)
- 3. (Original) The skin of claim 1 wherein the elastomeric material is a synthetic polymer.
  - 4. (Original) The skin of claim 3 which is a copolymer.
- 5. (Previously Presented) The skin of claim 4 wherein the copolymer is selected from the group consisting of one of the following: ethylene vinyl acetate copolymer, styrene-butadiane-styrene, styrene-isoprene-styrene, styrene-diene, styrene-isoprene-butylene block copolymers containing mineral oil, branched styrene copolymer, styrene butadiene, styrene-butadiene triblock, styrene-isoprene-styrene linear block polymer, styrene-butadiene radial block copolymer, butadiene-styrene copolymer.
- 6. (Currently Amended) A doll's skin comprising a seamless, injection molded elastomeric material which covers and is removed from at least a portion of a doll that is at least partially bendable or articulated and transforms the doll into a different character or object, wherein the elastomeric material has a 100% modulus of elasticity between about 120 and 350KN/m<sup>2</sup> and is sufficiently flexible and elastic to bend at bending or articulation locations of the doll.
- 7. (Previously Presented) The skin of claim 1 wherein the garment is adapted in size to be fitted to and removed from the doll having a height of less than about 8cm.

- 8. (Original) The skin of claim 2 wherein the garment is adapted in size to be fitted to and removed from the doll having a height of above 8cm to about 20 cm.
- 9. (Original) The skin of claim 1 in a form selected from the group consisting of animal, human, monster, super hero, robot, and cartoon character.
- 10. (Currently Amended) A seamless doll's garment comprising a seamless, injection molded elastomeric material having a molded shape to repeatedly fit over and removed from a doll having a height in the range of above 8cm to about 20cm and is sufficiently flexible and elastic to bend at articulation locations of the doll.
- 11. (Previously Presented) The doll's garment of claim 10 wherein the elastomeric material is a synthetic polymer.
- 12. (Previously Presented) The doll's garment of claim 11 further comprising at least one integrally molded detail.
- 13. (Currently Amended) A doll's skin comprising a seamless, injection molded elastomeric material which covers and is removed from at least a portion a doll that is at least partially bendable or articulated to transform the doll into a different character or object, and wherein the elastomeric material has a 100% modulus of elasticity between 120 and 350 KN/m<sup>2</sup> and is sufficiently flexible and elastic to bend at bending or articulation locations of the doll.
- 14. (Currently Amended) The doll's garmentskin of claim 13 wherein the elastomer material has a 100% modulus of elasticity between 240 and 280KN/m².
- 15. (Currently Amended) A play set comprising, in cooperative combination, a doll <u>that</u> is at least partially bendable or articulated and having a height in the range of 8 cm to about 20 cm, donned and fitted with a seamless synthetic polymer injection molded garment which removably encloses around at least a part of the doll and is adapted to be removed, dressed and refitted again

to the doll wherein the synthetic polymer has a 100% modulus of elasticity between about 120 and 350KN/m<sup>2</sup> and is sufficiently flexible and elastic to bend at bending or articulation locations of the doll.

- 16. (Original) The play set of claim 15 wherein the doll is articulated at one or more of the following: shoulders, elbows, knees, wrists, ankles, neck, head and hips.
  - 17. (Cancelled)
- 18. (Previously Presented) The play set of claim 15 wherein the synthetic polymer has a 100% modulus of elasticity between about 240 and 280KN/m².
  - 19. (Cancelled)
- 20. (New) A seamless doll's garment comprising a seamless, injection molded elastomeric material sized and shaped to approximate the size and shape of at least a portion of a doll that is at least partially bendable or articulated which is repeatedly fitted over and removed from the doll, has a wall thickness from 1 to 3 mm and is sufficiently flexible and elastic to bend at bending or articulation locations of the doll.
- 21. (New) A seamless doll's garment comprising a seamless, injection molded elastomeric material sized and shaped to approximate the size and shape of at least a portion of a doll that is at least partially bendable or articulated which is repeatedly fitted over and removed from the doll, wherein the elastomeric material has a 100% modulus of elasticity between 120 and 350 KN/m<sup>2</sup> and is sufficiently flexible and elastic to bend at bending or articulation locations of the doll.
